

LEADING THE WAY THROUGH INNOVATION

ABOUT AKATHERM

Over 50 years of experience in drainage systems, focussing on innovation, quality and dedication: that is Akatherm. Our specialist plumbing solutions are suitable for applications in the commercial and industrial building sector. We offer international certification, full training, unique products and the service standards you would expect from high performance drainage experts and the worldwide backing of the Aliaxis group.

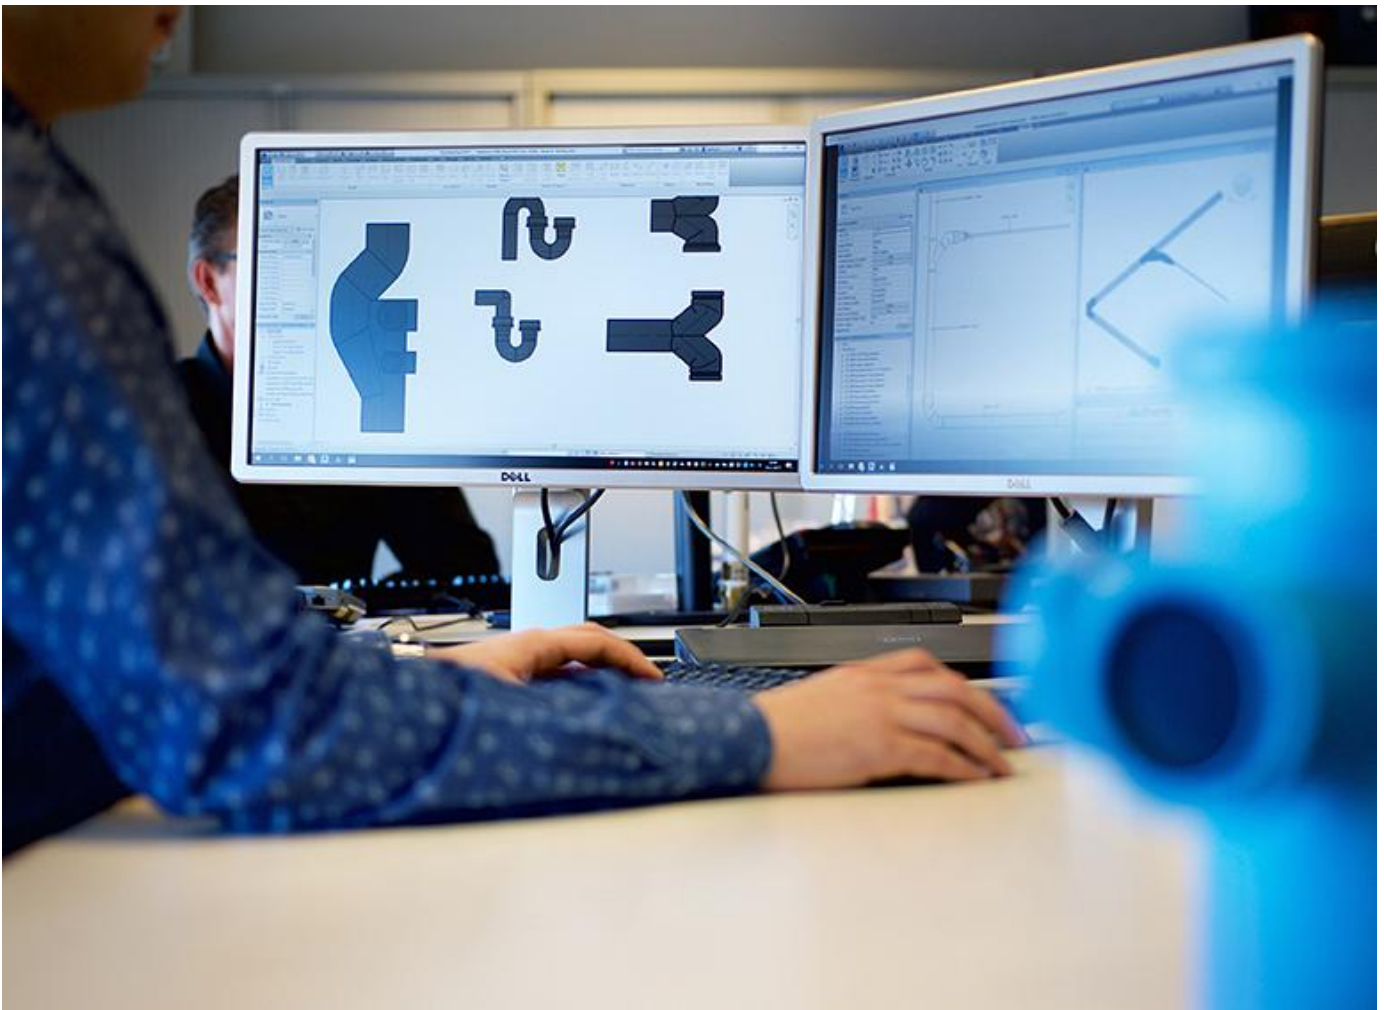

SPECIALIST PLUMBING SOLUTIONS

KNOWLEDGE

The results from our research will ultimately be integrated into innovative new products. The development and engineering of new products is carried out with the latest 3D CAD-software. With simulation tools like Computational fluid dynamics (CFD), Finite Element Analysis (FEA) and mould flow analysis (MFA) we have a tremendous assessment capability at our disposal to create the right product.

QUALITY MANAGEMENT

The Quality Management System of Akatherm has been certified according ISO 9001.
